Additional Notes	dimming low voltage electronic halogen transformers it must be transformer. Tungsten filament GU10 lamps must be branded dimmers should be de-rated by 25%. When dimming LED lar compatibility. When using mains voltage halogen load transfo switching a push to make retractive switch should be installed	TRAILING EDGE TECHNOLOGY DIMMERS. Are suitable for control of both resistive and inductive loads. When used for dimming low voltage electronic halogen transformers it must be noted that the dimmer controls the primary side of the transformer. Tungsten filament GU10 lamps must be branded with a fuse base. When using mains voltagehalogen lamps-dimmers should be de-rated by 25%. When dimming LED lamps de-rated by 75% - please contact our Technical for compatibility. When using mains voltage halogen load transformer - maximum rating is 210VA. NOTE: For multi-way switching a push to make retractive switch should be installed in the other positions. (Note:standard two way switches will not work with this product)
